LAB EXPRIMENTS

NAME: **B. BHANUTEJA REDDY** **REG.NO:** **192325016**

Exp 1: Online Library Management System:

AIM: To design and implement a responsive web interface for an Online Library Management System that enables users to search for books, track borrowing history, access study materials, and allows librarians to manage inventory, issue books, and calculate overdue fines.

ALGORITHM:

- Start the application and load the home page with the navigation bar (Login, Catalog, Borrow History, Material Download, Admin).
- User Authentication:
  - If the user is new, navigate to the Registration page and capture profile details.
  - If existing, authenticate credentials for either Student or Librarian Admin roles.
- Student/User Operations:
  - Search Catalog: Accept search queries by book title, author, year, or semester.
  - Borrow & Track: Display issued books along with Issue Date and Expiry Date.
  - Fine Calculation: Check return dates against due dates and compute fine amounts.
  - Study Material: Filter materials by academic year/semester and provide download access.
- Librarian Admin Operations:
  - Manage Inventory: Add, update, or remove books and course materials.
  - Book Circulation: Record book issuance, mark return status, and update fines for late submissions.
- Display feedback messages upon successful actions (e.g., book issued, fine cleared).
- Stop.

OUTPUT:

City Central Library Portal

Student Portal | Librarian Admin

Search Book Catalog

Search by Title, Author, or ISBN...

All Categories

ID	Book Title	Author	Category	Status	Action
101	**Database System Concepts**	Silberschatz	Computer Science	Available	Borrow
