Experiment 7: Online Beauty Parlour Appointment Booking System

AIM:

To implement a responsive appointment booking website for a beauty parlour that enables clients to book stylist slots, choose payment options, and manage bookings, while enabling salon managers to control schedules and lockout unavailable hours.

ALGORITHM:

Start and load the beauty parlour homepage displaying service offerings and stylist profiles.

User Registration & Login: Allow clients to register and log in to their personal account dashboard.

Service & Slot Selection:

- Browse beauty services (Hair, Skin, Spa) along with service durations and fees.
- Select a preferred stylist and choose an available date and time slot from the reservation calendar.

Checkout & Payment:

- Choose between full online payment or partial advance deposit using integrated gateways (Stripe, PayPal).
- Dispatch booking confirmation emails/SMS reminders upon transaction completion.

Customer Dashboard: Allow users to view upcoming appointments, review past service history, update personal data, or reschedule/cancel appointments.

Staff & Manager Admin Module:

- Add, edit, or cancel customer appointments.
- Access the reservation calendar to lock out unavailable hours, breaks, or stylist leave.
- Trigger SMS/call alerts to clients and cancel unpaid reservations automatically.

- **Feedback:** Record user reviews and suggestions post-service.
- **Stop.**

OUTPUT:
